### Rel Infra bags group's Rs 12,000-cr EPC deal

PB JAYAKUMAR  
Mumbai, 24 June

The Anil Dhirubhai Ambani Group (ADAG)-promoted Reliance Infrastructure (earlier Reliance Energy), has bagged the Rs 12,000-crore engineering, procurement and construction (EPC) contract for the 3,960 mw Sasan ultra mega power project (UMPP) of group company Reliance Power.

Sources said Reliance Power had been in consultation

with several international players to finalise the EPC contract. While most players were not willing to complete the project within the time frame suggested by Reliance Power, the group company offered to complete the project within a year ahead of the scheduled 60 months since awarding the contract.

Reliance Infrastructure will complete the first plant of the 6X660 mw project within 42 months and the remaining five will be commissioned with an interval of three months.
